## The most complete and advanced menu of diagnostic tests

Our breakthrough innovative tests help you keep pets and families healthier and happier. Every day, these IDEXX-exclusive tests are helping veterinarians discover more about the health of their patients:

- IDEXX SDMA® Test
- IDEXX CBC testing
- Fecal Dx® antigen testing
- IDEXX 4Dx® Plus Test

## Personalized support, guidance, and expertise

Behind every IDEXX test is a dedicated team of professionals willing to go the extra mile—or 20—to support you in your practice and on the phone every day. All so you can make the important decisions that impact the health and the lives of patients and their families. Only IDEXX surrounds you with support from:

- Veterinary Diagnostic Consultants
- Field Support Representatives
- Professional Service Veterinarians
- Medical Consultants
- Customer Support Representatives

## Technology and tools that make your work easier

We are committed to investing in technology that improves your experience, your workflow and your relationships—with both people and patients. For a holistic view of all diagnostics for every patient, log into VetConnect® PLUS. This online diagnostic resource supports fast, effective clinical decision-making.

- Access differential diagnoses to help interpret results and determine next steps.
- Spot trends and abnormalities with at-a-glance patient historical results.
- Improve client communications and increase compliance.
- Stay up to date, save time, and reduce errors

## The IDEXX Preventive Care difference

The tests, tools, and team to help you manage the lifelong health of your patients and build even stronger client relationships

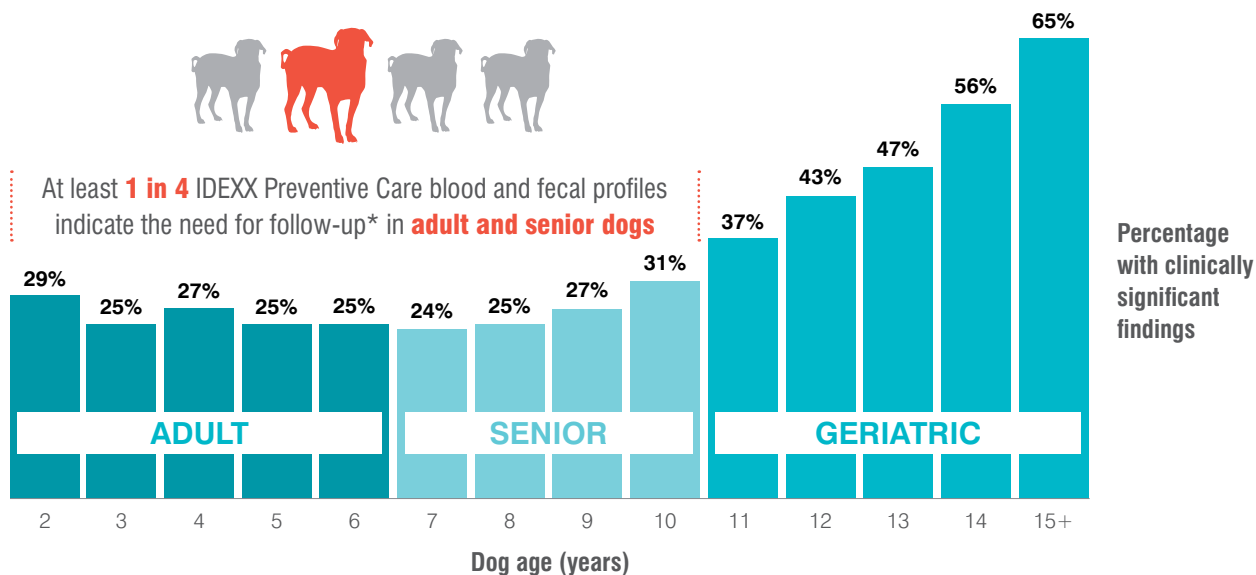

- The most complete and advanced menu of tests on IDEXX Preventive Care profiles
- Tools and technology that make protocol implementation and client communication easier.
- A team of experts dedicated to your success

# How do you discover more with the IDEXX Preventive Care profile?

New evidence supports running preventive care profiles on all adult dogs

## Dogs as young as 2 years of age had clinically significant findings based on results of preventive care bloodwork and fecal testing<sup>1</sup>

Of the nearly 30,000 canine profiles included in this analysis, there was little variation in the rate of clinically significant findings between adult dogs and senior dogs.

The study was based on an analysis of IDEXX Preventive Care profiles (including the following categories: Chem 22 including the IDEXX SDMA<sup>®</sup> Test, IDEXX CBC testing with reticulocyte parameters, the Lab 4Dx<sup>®</sup> Plus Test, and Fecal Dx<sup>®</sup> antigen testing) run as part of wellness visits. While the number of clinically significant findings for each of these testing categories varied by age, all categories were important for adult, senior, and geriatric dogs.

## These results are similar to a previous analysis that included cats as young as 2 years<sup>2</sup>

The previous analysis from more than a quarter of a million wellness visits that included a chemistry profile with an IDEXX SDMA<sup>®</sup> Test and a CBC, revealed significant findings required follow-up in:

**1 in 7** adults (cats aged 2–8 years; dogs aged 3–6 years)

**1 in 5** seniors (cats aged 9–13 years; dogs aged 7–10 years)

**2 in 5** geriatrics (cats aged 14+ years; dogs aged 11+ years)

## Routine preventive care testing has distinct medical benefits

There is ample evidence to support routine preventive care visits that include diagnostic testing. Results of routine bloodwork and fecal testing help veterinarians detect diseases and conditions, leading to earlier interventions that help patients of all ages live healthy lives for as long as possible. Once a veterinarian has baseline values, she/he can monitor trends and, if necessary, create individualized treatment plans. If no abnormality is detected, veterinarians and staff can—and should—celebrate the good news with clients. By communicating the value of every test result, practices reinforce the importance of routine wellness checks and the central role that clients play in the health of their pet. It's a win-win!

Review preventive care data and case studies at [idexx.com/1in4](https://idexx.com/1in4)

\*Due to "clinically significant findings," which would indicate the need for follow-up, further consideration, or a change in action by the clinician. Clinical significance based on rules determined by an IDEXX veterinarian panel.

### References

1. Data based on analyses of 29,795 canine wellness profiles (Chem 22 including IDEXX SDMA<sup>®</sup> Test, IDEXX CBC testing with reticulocyte parameters, the Lab 4Dx<sup>®</sup> Plus Test, and Fecal Dx<sup>®</sup> antigen testing) associated with wellness visits; testing performed at IDEXX Reference Laboratories on July 13, 2016–February 28, 2019. Represented U.S. regions by proportion of included profiles: Northeast (32.0%), South (41.3%), Midwest (17.4%), West (7.6%), and region not reported (1.7%).
